

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Recently retired, after spending many years working with his brother to manufacture their crane business into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road expedition.

All through their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite marketplace for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other building services.

Upon returning from their travels, John established a partnership with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they designed and sold the first JLG aerial work platform. The company incorporates some of the basic design elements of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into quite a few international marketplaces and continues to develop new machines to guarantee that consumers are able to become safer and more resourceful within their workplace.
