

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international establishment consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Equipment and Machine Tools and Mechanization Systems.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction department. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer wishes.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent dealers moving lift truck materials and materials handling equipment. This network permits Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably features 63 distinctive machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various vehicle designs vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American marketplace, due to its outstanding level of product performance and their consistently high level of client support and service given to all Doosan Infracore Forklift users. The U.S. forklift division stationed in Cleveland has a expert team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a nationwide equipment expansion venture. Early sales of this manufacturing equipment focused on large business groups, the armed forces and on state-run companies. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Domestic lift truck business for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a situation of considerable expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the very competitive North American materials handling industry. This joint-venture proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added products for export. In 1993, the company had a global sales network and started exporting designs they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international markets.
